**TEAM NUMBER: 12**

**TEAM MEMBERS:**

**CHANGES MADE:**

1. “Active Users” and “Total Users” were made separate attributes for the entity “Platform” (as suggested by the TA).
2. An identifying relationship was created for the weak entity “Contest” as “Platform CONDUCTS a Contest”.
3. We have removed the attribute “Team Rating” for the entity “Teams” as that is already a descriptive attribute for the relationship type “Register On” between Team and Platform.

**ASSUMPTIONS :**

1. A Platform will host atleast one Problem.
2. A Platform does not necessarily have to conduct a contest.
3. A Team is registered on atleast one Platform.
4. A Platform does not necessarily have to have Users.
